Documentation published: August 15, 2013

4.1 Executive Summary - DE Report

This document is intended for the users of the German language version of this report.

The 4.1 Executive Summary - DE report highlights the value of managed services to your customer. This report allows you to provide a brief Scorecard view of the current status of devices in key network areas, with options to include comprehensive summaries, work done and more details where applicable.

It allows for performance evaluation of key network areas and provides a score that indicates how your customer's network is performing. The current score is automatically compared the score of a previous reporting period allowing you to assess for any trending.

Use this report to show customers the difference your services make. Provide them with a comparison, a report before the provision of managed services and after the provision of managed services. When you provide this report for your customers on a regular basis it allows you to demonstrate your ongoing value to them.

Before you generate the report for the first time, we recommend you read this documentation, and check out the dependencies that need to be set up in N-central.

Note: If you have just installed Report Manager, we recommend that you wait two hours after installation before running the report in order to ensure that all the data is included in the generated 4.1 Executive Summary report,

Requirements

The minimum Report Manager release to run this report is 4.1 GA (4.1.0.105).

Files Included

This package contains the following:

- An RDL custom report file (4.1 Executive Summary Report - DE.rdl)
- An XML configuration file (4.1 Executive Summary Report Parameters - DE.xml), which will configure the UI control parameters for the report when uploaded
- A sample PDF of the report (4.1 Executive Summary Report - DE.pdf)

Uploading the Files to Report Manager

The RDL file included in this package is ready to be uploaded to Report Manager. Each RDL file also has a corresponding XML file that configures the UI control details.

1. Sign in to the Report Manager Administration Console.
2. Click **Custom Report Management**.
3. Click **Upload Custom Report**.
4. Click **Browse** to navigate to the file you want to upload.
5. Select the RDL file and click **Open**.
6. Select the **Upload a Config File** checkbox.
7. Click the **Browse** button that appears and navigate to the XML configuration file that corresponds to the RDL file you are uploading.
8. Select the XML configuration file and click **Open**.
9. Click **Next** to upload the report.
10. For information on UI control configuration, refer to the Administration Console online help, **Create Custom Reports > Templates > Executive Summary**.

Disclaimer

This document may include planned release dates for service packs and version upgrades. These dates are based on our current development plans and on our best estimates of the research and development time required to build, test, and implement each of the documented features. This document does not represent any firm commitments by N-able Technologies Inc. to features and/or dates. N-able Technologies will at its best effort, try to meet the specified schedule and will update this document should there be any significant changes. N-able Technologies reserves the right to change the release schedule and the content of any of the planned updates or enhancements without notice. Publication or dissemination of this document alone is not intended to create and does not constitute a business relationship between N-able Technologies and the recipient.

Feedback

N-able Technologies is a market driven organization that places importance on customer, partner and alliance feedback. All feedback is welcome at the following email address: feedback@n-able.com.

About N-able Technologies
